## TECHNICAL SKILLS

### FRONTEND

React.js

JavaScript ES6+

Tailwind CSS

HTML5

CSS3

### BACKEND

Node.js

Express.js

Django

REST APIs

Socket.IO

### DATABASES

MongoDB

SQL

### LANGUAGES

JavaScript

Python

C

C++

### AI / CLOUD

ML Fundamentals

API Integration

Cloud Fundamentals

### TOOLS

Git & GitHub

Postman

VS Code

Photoshop

Premiere Pro

After Effects

## EDUCATION

### Bachelor of Computer Applications (BCA)

Midnapore City College, Vidyasagar University  
2023 – 2026 (Expected)

CGPA: 8.0/10

### Higher Secondary – WBBHSE

West Bengal Board

Year: 2020

85%

### Secondary – WBBSE

West Bengal Board

Year: 2018

89%

## CERTIFICATIONS

### The Complete Full-Stack Web Development Bootcamp

Udemy • Dr. Angela Yu • May 2026

[View Certificate](#)

### IBM SkillsBuild – Decoding Data: Insights & Impact through Analytics

CSRBOX Foundation • IBM SkillsBuild • Jul–Aug 2025

Team ID: IBM25PBL3882

### Actively pursuing certifications in AI, Cloud Computing, and advanced Full Stack Development.

## PROFESSIONAL SUMMARY

Aspiring Software Developer with hands-on experience in full-stack web development, AI integration, and cloud-based technologies. Skilled in building end-to-end applications—from real-time communication platforms to machine learning-powered solutions—using the MERN stack, Python, and modern development tools. Passionate about solving real-world problems through scalable software and eager to contribute to collaborative, innovation-driven engineering teams.

## PROJECTS

### Barta – Real-Time Chat

[GitHub](#)

[Live Demo](#)

Node.js · React · Socket.IO · MongoDB

- Architected a full-stack real-time messaging platform leveraging **Socket.IO** for sub-100ms bidirectional communication, supporting concurrent multi-user sessions.
- Engineered a scalable REST API with **Node.js & Express.js**, implementing JWT-based authentication and encrypted session management for secure user onboarding.
- Built a fully responsive React frontend with dynamic message rendering, optimized for performance and seamless cross-device UX.

### Agriculture AI Platform

[GitHub](#)

[Live Demo](#)

React.js · Python · Machine Learning

- Developed an AI-powered agricultural intelligence platform that applies **ML models** to analyze environmental datasets and deliver actionable crop yield predictions.
- Designed and integrated an interactive **React dashboard** for real-time data visualization, enabling farmers to make informed, data-driven decisions.
- Built a Python backend data pipeline for preprocessing environmental inputs and exposing ML inference endpoints via REST API.

### Twitter Clone

[GitHub](#)

[Live Demo](#)

Django · Python · SQLite · MVC

- Built a feature-rich social media clone using **Django (Python)** with user authentication, tweet creation, follow system, and feed aggregation.
- Implemented **Django ORM** for complex relational data modeling (users, tweets, likes, follows) and Django's MVT architecture for clean code separation.

### Music Recommendation System

[GitHub](#)

[Live Demo](#)

Python · Machine Learning · Audio Processing

- Built a personalized recommendation engine using **collaborative filtering and content-based ML algorithms** to deliver user-preference-driven music suggestions.
- Processed audio features from datasets to train a predictive model, simulating a production-grade recommendation pipeline with measurable accuracy gains.

## ADDITIONAL INFORMATION

- Passionate about **Artificial Intelligence, Cloud Computing**, and emerging technologies; consistently building personal projects to deepen practical expertise beyond the academic curriculum.
- Strong **self-learner and problem-solver**; independently architected and delivered multiple full-stack and ML projects from concept to deployment, demonstrating initiative and technical ownership.
- Proficient in **English and Bengali** (native); effective written and verbal communicator with the ability to articulate technical concepts clearly in professional environments.
